◎ BEFORE USE

Thank you for purchasing POLARON POWER SUPPLY (12V 25A). This system is extremely versatile and may be used by beginners and pros alike. In order for you to make the best use of your system, please read this manual carefully. If you have any difficulties while using your system, please consult the manual, our online Frequently Asked Questions (on the web pages referenced below), your hobby dealer, or the Graupner/SJ Service Center.

Due to unforeseen changes in production procedures, the information contained in this manual is subject to change without notice.

◎ SUPPORT AND SERVICE

• Customer support

Please feel free to ask any question by e-mail or phone. We' ve been trying to deal with your question. We are open from nine to six, Monday to Friday in Korea. We may respond to your question by e-mail as soon as possible when we are close.

• Internet sales site

Please feel free to contact "www.openhobby.com" to stay up to date the latest Graupner/SJ Firmware and the newest product line up

• A/S regulation

Only when the product is faulty after normal operation within the warranty period, we will repair the product for free based on our regulations. The repair will be paid for by the consumer when the damage is due to use in improper ways or beyond the warranty period.

• Warranty regulation

◎ SPECIFICATION

Input power	AC100-240V(Free voltage)
Output voltage	DC 12V
Output current	25A (Max 30A)
USB output	5.0V 1.0A
Output terminal	Front 2CH (Additional power output), Side 1CH (Docking with POLARON EX/PRO)
Cooling Fan	40x40x20mm (1.57x1.57x0.79in)
Size	194.6x199.4x55mm (7.66x7.85x0.79in)
Display	BLACK&WHITE BACKLIGHT SEG LCD DISPLAY TYPE
Weight	1213g (42.79oz)

- ① Cooling Fan
- ② Power switch
- ③ 100~240V: AC input(100~240V)
- ④ BLACK&WHITE BACKLIGHT SEG LCD DISPLAY TYPE
- ⑤ External temperature sensor
- ⑥ 1Ch Output terminal
- ⑦ 2Ch Output terminal
- ⑧ USB 5.0V 1.0A
- ⑨ SMPS Docking terminal

- ④ BLACK&WHITE BACKLIGHT SEG LCD DISPLAY TYPE
- ⑤ External temperature sensor
- ⑨ SMPS Docking terminal

◎ DISPLAY EXPLANATION

◎ FEATURES

- The stable DC 12V output by switching power supply system
- The rated 25A (Max 30A) is able to cover all of Graupner/SJ charger
- AC100~240V/50~60Hz Input
- 0~40°C Category temperature range
- Short circuit / Over voltage / Over current / Over power protection function
- 100% full load burn-in test.
- Built in ON/ OFF switch
- Heat suppression design by built in cooling fan and compact circuit
- Several devices can get the power from multi-output at a time
- 5.0V, 1.0A output throughout USB terminal
- Short sensing circuit design
- Easy to carry by small size and light weight
- Docking system with POLARON EX/PRO Charger
- Easy to check the actual voltage and current on LCD
- Enable to check the external temperature on LCD

◎ OPERATING INSTRUCTION

1. Read thoroughly the following instruction before using.
 2. Disconnect the power supply from AC mains power before connecting the device to the power supply.
 3. Connect the device to the power supply ensuring the correct polarity. Red is positive, Black is negative
 4. Connect to the charger (POLARON EX/PRO) that can be used in Docking system with the double gold connector
 5. Switch " OFF " with the switch on the rear of this unit and connect AC power cable
 6. Switch " ON " with the switch on the rear of this unit then this unit initiates to supply the power
- NOTICE: The actual voltage and current should be in the specification of this unit

◎ SAFETY PRECAUTIONS

- Never input AC power to DC output terminal
- When POLARON EX/PRO is in Docking with this unit, never input the power to POLARON EX/PRO from the other power supplier. It may cause damage to the charger and power supplier.
- The output terminal on the side of this unit is for Docking terminal with POLARON EX/PRO. Other charger should use the output terminal on the front
- Do not leave this unit unattended while it is working. The initial reaction is very important in case of damage or fire.
- Be cautious about the short circuit for output cable
- Do not use the too shot cable or damaged cable.
- Do not reverse the positive and negative terminals. Wrong connection will damage the battery and the charger
- Be sure to use this unit within the specification
- Do not allow water, moisture or foreign objects into the charger
- Do not use in humid place and do not operate with wet hands
- Make sure to stop operating this unit when it gets wet, the out of order of by moisture might not be repaired.
- Make sure to stop operating if there is a smell of burning in this unit or it is too hot.
- Do not attempt to modify or disassemble this unit. In this case, A/S might not be provided.
- The repair will be paid for by the consumer when the damage is due to use in improper ways or beyond the warranty period.
- Do not use on the fleecy material such as carpet, blanket, bed, cushion and make sure to use in a hard and flat surface
- Do not use in too hot or cool place and the place exposed to direct sunlight.
- Make sure to use in a well ventilated place and do not block the cooling fan (rear)
- Always disconnect all devices, battery and AC power after charging
- This product is only intended for use with unmanned, hobby-grade remote-controlled vehicles, aircraft, helicopter and boat. OPENHOBBY disclaims all liability outside of the intended purpose and will not provide warranty service related thereto.

Age Recommendation: Not for Children under 14 years. This is not a toy.
